

Nate Doolittle, PE

Partner and Civil Engineer

LandDesign

Nate Doolittle is a Partner and Civil Engineer. Nate is responsible for leading a number of the firm's public and private infrastructure and site development projects throughout the Southeast US. Nate has a keen understanding of public/private projects, with a wide variety of expertise in large scale developments to urban infill projects. He also leads LandDesign's Higher Education market with experience in educational, athletic, residential, and infrastructure campus work. His valuable experience includes a variety of large-scale mixed-use developments, campus and university work, and urban infill redevelopment that required site assessment, environmentally sustainable design, and innovative infrastructure solutions. Nate thrives in situations where he can help lead and collaborate on innovative and complicated projects, embracing the success of the team strategy and vision. Nate works to 'implement the projects vision, not engineer the master plan'.
